

wayland::proxy\_t

```
graph BT; A[wayland::shell_surface_t] --> B[wayland::proxy_t]
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a gray rectangular box containing the text 'wayland::shell\_surface\_t'. A blue arrow points vertically upwards from the center of this box to the center of a white rectangular box above it. The white box contains the text 'wayland::proxy\_t'. This visualizes that 'wayland::shell\_surface\_t' is a base class and 'wayland::proxy\_t' is a derived class.
